

RESULTS OF ENROLLMENT INTENTION SURVEY FOR EXISTING HILLCREST FAMILIES

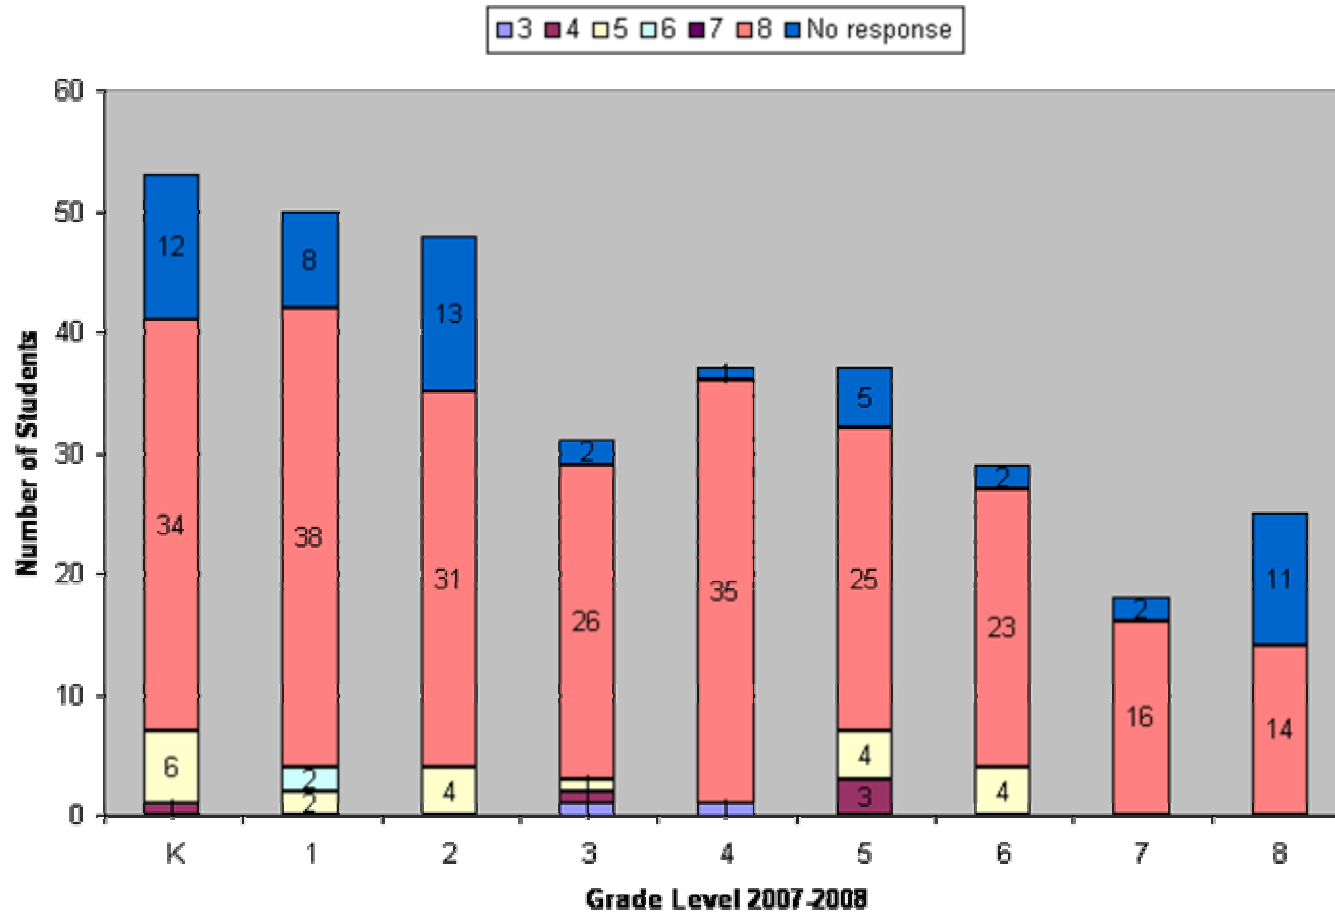

The following three charts display the results of the survey conducted of existing Hillcrest families regarding their estimation of the highest grade their children are most likely to complete at Hillcrest School. Each chart is accompanied by a 'How to Read This Chart' explanation to aid the reader. The charts depict only the data submitted. They do not analyze the data nor do they express an opinion as to what the data means. The data will be analyzed by the Long Range Planning Committee as it prepares its report to the District. The Committee appreciates the response rate of the Hillcrest Community to these questions and wants to share the results with the community.

Another portrayal of the results is available at

These charts reflect surveys completed through June 26, 2007.

Estimated Departure Grades

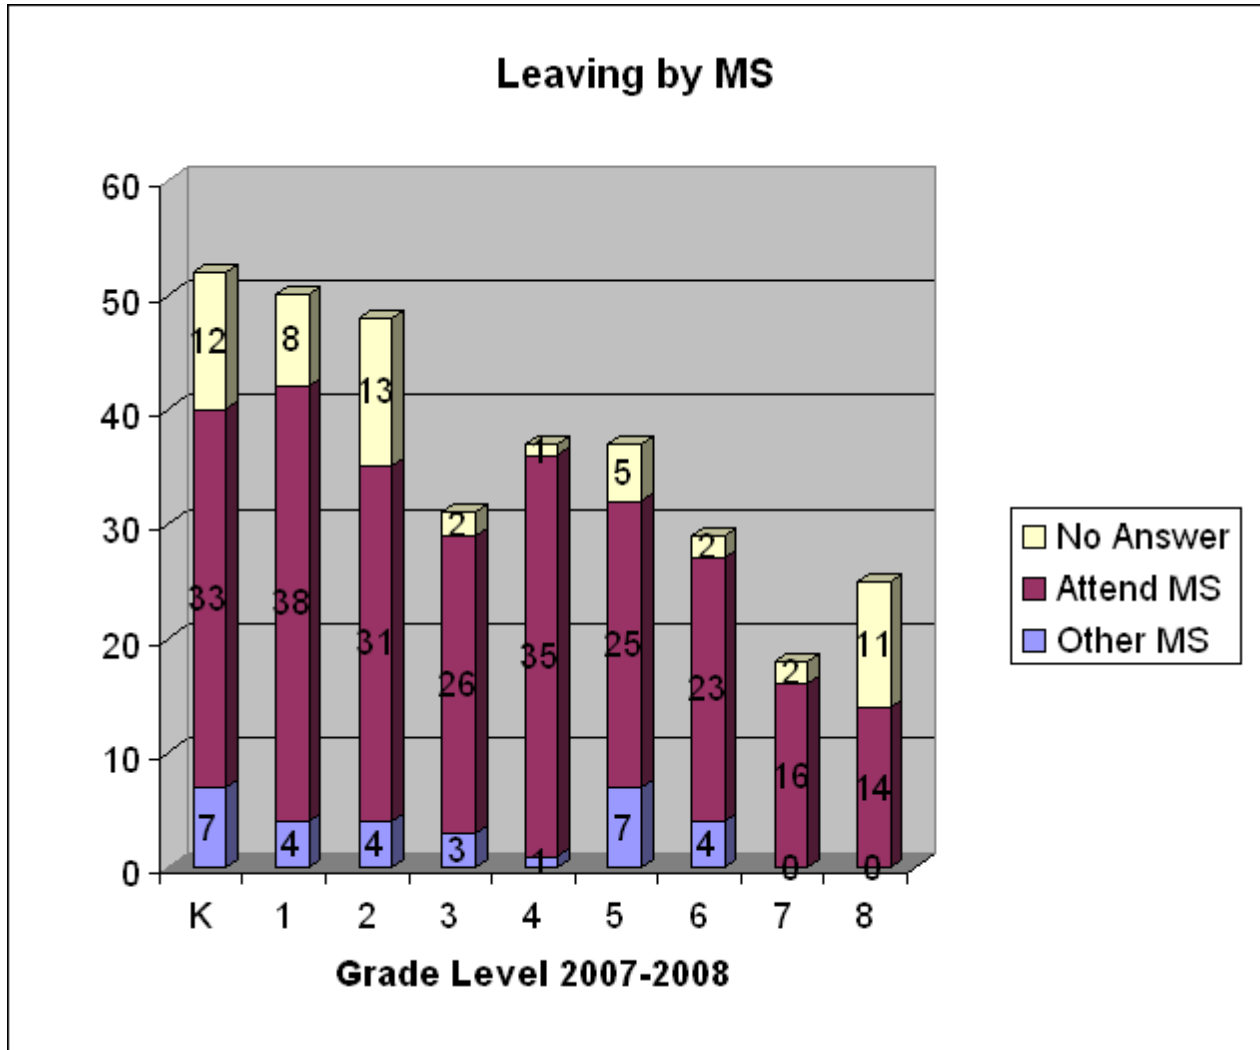

How to Read This Chart: The X axis is grade level identified by the responder for 2007-2008. For, example for every responder who listed K as the grade for 2007-2008, the bars above indicate the highest grade the responder indicated this child is most likely to complete at Hillcrest. In this case, 34 of the 2007-2008 Kindergarten class parents responded that their children are most likely to attend Hillcrest through 8th grade, while 6 answered that they are most likely to attend through 5th grade, 1 through 4th grade, and 12 did not respond.

Leaving Grade & Confidence Level

How to Read This Chart: The X axis is the grade level identified by the responder for 2007-2008. For, example for every responder who listed K as the grade for 2007-2008, the bars above indicate the highest grade the responder indicated this child is most likely to complete at Hillcrest broken down by their confidence level in that answer. In this case, parents of 34 of the 2007-2008 Kindergarten class stated their child is most likely to attend Hillcrest through 8th grade -- 2 with low confidence, 10 with medium, and 22 with high confidence in that answer, while the survey was not completed for 12 of the kindergarten children.
